Story # 23:		Booking a Service	Priority	
			Effort	2
As a	Customer			
I want	Book a Service			
So that I can	Avoid calling them to make a booking			

Acceptance criteria	<p>Criterion i:</p> <ul style="list-style-type: none"> - Given that I am Logged in to my account <ul style="list-style-type: none"> ○ And I have navigated to the booking page ○ And I have selected a service, an employee and a booking date and time - When I press make booking - Ensure that a request is sent to the backend <ul style="list-style-type: none"> ○ And ensure that each field is checked for validity ○ And check that no clashes exist ○ And create a new entry into the booking table in the backend ○ And notify the customer that the booking creation was successful <p>Criterion ii:</p> <ul style="list-style-type: none"> - Given that I am logged in to my account <ul style="list-style-type: none"> ○ And I have navigated to the booking page ○ And I have selected a service, an employee and a booking time that is outside working hours - When I press make a booking - Ensure the request is sent to the backend <ul style="list-style-type: none"> ○ And ensure that each field is checked for validity ○ And ensure that the booking is recognised as a time outside working hours ○ And ensure the booking is rejected ○ And ensure a response is sent to the frontend ○ And ensure the user that the booking is invalid <p>Criterion iii:</p> <ul style="list-style-type: none"> - Given that I am logged in to my account <ul style="list-style-type: none"> ○ And I have navigated to the booking page ○ And I have selected a service an employee and a booking time that is already scheduled - When I press make a booking - Then ensure the booking time is checked for validity <ul style="list-style-type: none"> ○ And ensure the password fails the server-side check ○ And ensure a response is sent back to the frontend ○ And ensure the user is notified that a booking already exists <p>Criterion iv:</p> <ul style="list-style-type: none"> - Given that I am logged in to my account <ul style="list-style-type: none"> ○ And I have navigated to the booking page ○ And I have not selected a service - When I press make booking - Then ensure the booking button is inactive <ul style="list-style-type: none"> ○ And ensure the user is notified that they need to fill in all fields
---------------------	--

Story # 1:		Owner viewing all booking	Priority	
			Effort	5
As a	Owner			
I want	See all the bookings for this week			
So that I can	See how busy we are for that week/day			
Acceptance criteria	<p>Criterion i:</p> <ul style="list-style-type: none">- Given that I am Logged in to and admin account<ul style="list-style-type: none">o And I have navigated to the view bookings page- When I select view bookings- Ensure that I can see all of the bookings for the upcoming week<ul style="list-style-type: none">o And ensure I can see a brief detailing of each booking <p>Criterion ii:</p> <ul style="list-style-type: none">- Given that I am logged in to an admin account<ul style="list-style-type: none">o And I have navigated to the view bookings pageo And there are no bookings in the system- When I select view bookings- Ensure that I am notified there are no bookings			

Story # 25:		Accepting and Declining Bookings	Priority	
			Effort	4
As a	Owner			
I want	To be able to accept or decline a request to book			
So that I can	Manage my services properly			
Acceptance criteria	Criterion i: <ul style="list-style-type: none">- Given that I am Logged in to my admin account<ul style="list-style-type: none">o And I have navigated to the bookings screeno And I have selected upcoming bookings- When I press decline booking- Then ensure that a delete request is sent to the backend<ul style="list-style-type: none">o And ensure the booking is removed from the backend			
	Criterion ii: <ul style="list-style-type: none">- Given that I am Logged in to my admin account<ul style="list-style-type: none">o And I have navigated to the bookings screeno And I have selected upcoming bookings- When I press accept booking- Then ensure that a request is sent to the backend<ul style="list-style-type: none">o And ensure the booking is set to accepted in the backend			

ACCEPTANCE TESTS

ID	13.1
Purpose	Creating a new unique account
Setup	None
Steps	1. Navigate to Register New User page
	2. Select Register New User
	3. Enter new user details
Expected Result	System checks details against the existing user accounts, finds the user is unique and a new account is created and the page redirects to homepage

ID	13.2
Purpose	Creating an account, but giving invalid input (in this case, an invalid phone number)
Setup	None
Steps	1. Navigate to Register New User page
	2. Select Register New User
	3. Enter new user details
	4. Enter a phone number "12vv22132"
Expected Result	System checks details, and determines that the phone number is invalid, the account is rejected and the user is informed

ID	13.3
Purpose	Creating an account with an already existing username
Setup	User already exists in the database with username "user1"
Steps	1. Navigate to Register New User page
	2. Select Register New User
	3. Enter new user details
	4. Enter username "user1" in the username field
Expected Result	System checks details against the existing user accounts, finds the username already exists in the database, the account is rejected and the user is informed

ID	17.1
Purpose	Changing the password
Setup	User is logged in
Steps	1. Navigate to the Customer page
	2. Select update details
	3. Enter the new password ("password")
Expected Result	System checks details and the new password passes checks, the new password is then saved to the database and the user is informed the update was a success

ID	17.2
Purpose	Changing the password to an invalid password (1 character long)
Setup	User is logged in
Steps	1. Navigate to the Customer page
	2. Select update details
	3. Enter the new password ("a")
Expected Result	System checks details and the new password fails the server side check, the password is rejected and the user is informed of the failed update

ID	17.3
Purpose	Changing the password and leaving the field blank
Setup	User is logged in
Steps	1. Navigate to the Customer page
	2. Select update details
	3. Enter the new password ("")
Expected Result	System checks details and the new password fails the check, the password is rejected and the user is informed of the failed update.

ID	23.1
Purpose	Making a valid booking
Setup	User is logged in, A service exists in the database called "Barber", A staff member exists in the database called "John", who works at "Barber" and they have no existing bookings from 1-2pm on Wednesday
Steps	1. Navigate to the Make a booking page
	2. Select the service "Barber"
	3. Select the staff member "John"
	4. Select the booking date and time as Wednesday 1-2pm
	5. Select "Book"
Expected Result	System checks the booking details, determines that all fields are valid and generates a booking and stores it in the database, the user is then informed the booking was successful

ID	23.2
Purpose	Making a booking outside working hours
Setup	User is logged in, A service exists in the database called "Barber", A staff member exists in the database called "John", who works at "Barber" and their working hours are listed between 9am-5pm 7 days a week
Steps	1. Navigate to the Make a booking page
	2. Select the service "Barber"
	3. Select the staff member "John"
	4. No timeslot exists in the 10pm-11pm timeslot

Expected Result	System checks the booking details, and determines that the booking time is outside the timeslot, and no booking time is displayed.
-----------------	--

ID	23.3
Purpose	Making a booking in an already booked timeslot
Setup	User is logged in, A service exists in the database called "Barber", A staff member exists in the database called "John", who works at "Barber" and they have an existing booking from 1-2pm on Wednesday
Steps	1. Navigate to the Make a booking page
	2. Select the service "Barber"
	3. Select the staff member "John"
	4. No booking exists in the 1-2pm timeslot
Expected Result	System checks the booking details, determines that all fields are valid and then determines that a booking already exists for "John" between 1-2pm on Wednesday, no booking time is shown in the timeslot

ID	23.4
Purpose	Making a booking without selecting a service
Setup	User is logged in, A service exists in the database called "Barber"
Steps	1. Navigate to the Make a booking page
	4. Select "book"
Expected Result	System recognizes that the service field (along with the other fields) has been left blank, therefore the submit button has been disabled and the user is informed that no service has been selected

ID	1.1
Purpose	Owner views the weeks current bookings
Setup	Admin is logged in, and a booking exists on Wednesday between 1-2pm
Steps	1. Navigate to the bookings page
	2. Selects view current bookings
Expected Result	System retrieves this weeks current bookings, including the Wednesday 1-2pm booking, and it is displayed to the user.

ID	1.2
Purpose	Owner views the weeks current bookings with no bookings in the system
Setup	Admin is logged in, and no bookings are present in the system
Steps	1. Navigate to the bookings page
	2. Selects view current bookings

Expected Result	System retrieves this weeks current bookings, determines that no bookings exist, and is informed that there are no bookings.
-----------------	--

ID	25.1
Purpose	Owner rejects a booking with "John" at Wednesday between 1-2pm
Setup	Admin is logged in, and a booking has been requested with "John" between 1-2pm on Wednesday
Steps	1. Navigate to the bookings page
	2. Selects view current bookings
	3. Select "reject" on the booking with John on Wednesday between 1-2pm
Expected Result	System sends a Delete request to the database, and the booking is removed from the database and the admin is informed that this was successful.

ID	25.2
Purpose	Owner accepts a booking with "John" at Wednesday between 1-2pm
Setup	Admin is logged in, and a booking has been requested with "John" between 1-2pm on Wednesday
Steps	1. Navigate to the bookings page
	2. Selects view current bookings
	3. Select "accept" on the booking with John on Wednesday between 1-2pm
Expected Result	System sends a Put request to the database, and the booking is updated in the database to be "accepted", the admin is informed this was successful
