

AWS CD deployment with a stage gate

The screenshot shows the AWS CodePipeline console for a pipeline named 'DeployMajor' (ID #3). The pipeline is in a 'Success' state. The workflow 'build-and-deploy' consists of several stages: Frontend, deliverFrontend, Backend, deliverBackend, StageGate, and liveDeploy. The 'StageGate' stage is currently in an 'On Hold' state, which has triggered an 'Approve Job' modal dialog. The modal contains the text 'This job requires approval before the workflow can continue running.' and a list of jobs for the 'build-and-deploy' workflow, with 'StageGate' selected. The modal has 'Cancel' and 'Approve' buttons. The background shows the pipeline history with a duration of 15m 32s.

PIPELINE	STATUS	WORKFLOW	BRANCH / COMMIT	START	DURATION	ACTIONS
DeployMajor #3	Success	build-and-deploy	master 5fcdce7 Update pom.xml	18m ago	15m 32s	...
	Success	Frontend			46s	
	Success	deliverFrontend			4m 4s	
	Success	Backend			3m 9s	
	Success	deliverBackend			1m 18s	
	Success	StageGate			5m 34s	
	Success	liveDeploy				

Approve Job

This job requires approval before the workflow can continue running.

build-and-deploy
