

Story # 31: Seeing the Employee availability.		Priority	Low
		Effort	2
As an	Administrator		
I want	to be able to see employee availability		
So that I can	create a new working roster.		
Acceptance criteria	Criterion i: Given that I have an admin account and I successfully login and navigate to the employee page <ul style="list-style-type: none">- I can see the employees' availability that has yet to be approved- I can approve or reject the availabilities given by the employee, when I approve them, it will be shown as approved on the individual employee's page. (this will be the roster)		
	Criterion ii: Given that I have an admin account and I successfully login and navigate to the employee page <ul style="list-style-type: none">- I can see the employees' availability that has yet to be approved- I can approve or reject the availabilities given by the employee, when I reject them, it will be shown as rejected on the individual employee's page. (this will be the roster)		

Story # 32:		Setting the availability	Priority	High
			Effort	4
As an	Employee			
I want	set my availability for each day			
So that I can	schedule time off for myself.			
Acceptance criteria	Criterion i: Given that I have an employee account and I successfully login and navigate to the employee page <ul style="list-style-type: none">- I can see the days of the week, and next to that a tick and a cross.- When I click on the tick it is marked that I am available on that day and It is marked as Ture on the database for that specific day.			
	Criterion ii: Given that I have an employee account and I successfully login and navigate to the employee page <ul style="list-style-type: none">- I can see the days of the week, and next to that a tick and a cross.- When I click on the cross it is marked that I am not available on that day and It is marked as False on the database. for that specific day.			

Story # 33: Not being able to cancel booking within 48 hours		Priority	Moderate
		Effort	4
As an	owner		
I would like	the client to not be able to cancel a booking withing 48 hours		
So that my employees	can better prepare		
Acceptance criteria	Criterion i: Given that I have a customer account and I successfully login and navigate to the customer page <ul style="list-style-type: none">- I can see all my previous bookings with a cancel button next to it.- If I try to cancel a booking that is within the 48 hours leading to the booking, the cancel button will show as disabled. I will not be able to click on that button.		
	Criterion ii: Given that I have a customer account and I successfully login and navigate to the customer page <ul style="list-style-type: none">- I can see all my previous bookings with a cancel button next to it.- If I try to cancel a booking that is not within the 48 hours leading to the booking, the cancel button will work as intended. I will be able to click on that button. When that button is clicked the booking deletes from the database.
