Criterion I:

ID	17.1
Purpose	Being able to change the password for a user with a correct password in both new password and confirm password field
Setup	A user called customer already exists in the system with a password
Steps	1. Navigate to login page
	2. Login to Account
	3. Navigate to view account page
	4. Click edit password
	5. Enter the new password "admin123" in the new password field
	6. Enter the new password "admin123" in the confirm password field
	7. Click Save
Expected Result	System sends out an alert and notifies user that the new password has been saved. Page redirects to view account page

Criterion ii:

ID	17.3
Purpose	Changing the password with a new password where the new password field doesn't match the
Catura	confirm password field
Setup	A user called customer already exists in the system with a password
Steps	1. Navigate to login page
	2. Login to Account
	3. Navigate to view account page
	4. Click edit password
	5. Enter the new password "admin123" in the new password field
	6. Enter the new password "testPassword" in the confirm password field
	7. Click Save
Expected Result	System sends out an alert and notifies user that both password fields do not mach. Page does not redirect

Criterion iii:

ID	17.2
Purpose	Changing the password with a new password that contains something other than the characters {[a-z] [A-Z] [0-9] [@&_]+{7,}
Setup	A user called customer already exists in the system with a password
Steps	1. Navigate to login page
	2. Login to Account
	3. Navigate to view account page
	4. Click edit password
	5. Enter the new password "new Password%" in the new password field
	6. Enter the new password "new Password%" in the confirm password field
	7. Click Save
Expected Result	System sends out an alert and notifies user that the password must only contain uppercase/lowercase letters, numbers and/or the symbols @, &, _, and the length must be greater than 7 characters and contain no whitespace.
	Page does not redirect
