Meeting Minutes

Weekly Meeting with team/Supervisor

Meeting No: 12 (THURSDAY meeting)

Duration: X

Meeting Details

Date:	03/09/2020
Venue:	Microsoft Teams
Attendees:	Jack Williams Julian Rizzo Theodore Politis Dulshan Kodithuwakku Ghaida Alharbi
Apologies:	N/A

Information / Decisions

No.	Item
1	Discussed the issue of application throwing transient object exceptions when dealing with booking and roster testing. Objects must be added to their respective databases first or needed to use MockBeans.
2	Discussed milestone 1 marking and the branches in github. They must be left open as a requirement for marking.
3	Run through of the session variables and how the application is currently set up to handle account login requests. User account details are stored as a state/prop and can be accessed in App.js. Error for insecure password that occurs in Google Chrome can be ignored, occuring from lack of password security in the database. Function used on submit button (handleSubmit).
4	Attempt to future proof developemnt to prevent as many possibilitites for errors to occur. Regex for all input fields, dropdown menus for inputs etc.
5	Developmental tips for React: Ensure the use of this.setState **not** state = value Can use => or use bind
6	Additional object identifier added, ie. EmployeId is used for database tracking whereas EmployeeIdentifier is used for development referencing.
7	Create custom exceptions for easy debugging in the front-end.

Action Items

No.	Item	Who	By
1	Unit testing to be completed alongside developemnt of features. Ensure at least 80% coverage in testing.	All	2 weeks
2	Enzyme testing to be completed for front end components	All	
3	Continue with task allocations for the remainder of the week	All
